Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Notice to Applicant

1. This communication is in response to the application filed 23 September 2003. Claim 1 is pending.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claim 1 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Under the statute, the claimed invention must fall into one of the four recognized statutory classes of invention, namely, a process (or method); a machine (or system); an article of manufacture; or a composition of matter.

(A) Under the guidance of recent case law, the requirements of 35 U.S.C. 101 are met when “the practical application of the abstract idea produces a useful, concrete, and tangible result” (State Street Bank & Trust Co. vs. Signature Financial Group, Inc., 47 USPQ2d 1596, 1601-02 (Fed. Cir. 1998)).

In the present case, the claimed invention allows collaboration using web clients through the Internet (i.e., useful), however does not perform steps that are repeatable or concrete that can be used in an insurance underwriting process.

Further, for a claimed invention to be statutory it must also produce a tangible result, and it is respectfully submitted that in the present case, claim 1 does not have a tangible result, as there is no tangibly embodied real-world outcome or consequence that results from the method steps, and thus the invention fails to recite the practical application of an abstract idea to satisfy the requirements of 35 U.S.C. 101.

In light of the above, it is respectfully submitted that the claimed invention, although useful, is neither tangible nor concrete, and thus fails to recite the practical application of an abstract idea to satisfy the requirements of 35 U.S.C. 101.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Surbey et al. (WO 0225470 A1).

(A) As per claim 1, Surbey teaches a method for facilitating communication among participants in an insurance underwriting process (Surbey; page 12, paragraphs 1-2), comprising: providing a web-centric system for allowing said participants to collaborate using web clients through the Internet (Surbey; page 8, paragraph 1 to page 9, paragraph 1, page 12, paragraphs 1-2);

wherein each of said participants is associated with a role, said role determining one of a set of modules available to said each of said participants and a set of business data available to said each of said participants (Surbey; page 8, paragraph 1 to page 9, paragraph 1, paragraph bridging pages 21-22).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure. The cited but not applied references, Felsher, U.S. Patent Application Publication Number 20020010679, Hele et al., U.S. Patent Application Publication Number 20020116231, Filep, U.S. Patent Number Application Publication 20030078816, Klaus, U.S. Patent Number 7080020, Labelle et al., U.S. Patent Number 7240017, Luedtke, U.S. Patent Number 7249038, Stender et al., U.S. Patent Number 7333939 teach the environment of collaborating using web clients over the Internet.
